

UNDERSTAND ALZHEIMER'S EDUCATE AUSTRALIA

The Interprecare[®] Master Class

Language differences among residents and staff do not have to be barriers to effective communication. This innovative system was developed by Dr. Cameron Camp and his colleagues and centres on a simple set of phonetic sounds that combine to simulate virtually any language. The significance of this for multilingual residential communities is better communication and quality of life for residents and staff alike.

Dr Cameron Camp PhD

Director of Research, Center for Applied Research in Dementia, Ohio USA

Dr Camp is an internationally-known research scientist in the field of ageing. He has been conducting applied and translational research in gerontology, dementia intervention, and cognitive intervention for over 30 years. He has served in academic settings, teaching coursework in adult development and ageing, rising to the position of Research Professor of Psychology. Dr. Camp holds workshops on designing cognitive and behavioural interventions for dementia internationally. His current research involves the use of Montessori-based activities as rehabilitative interventions to enable long-term care residents with dementia to effectively lead activities for other residents with dementia.
